About Al Hussaini

Al Hussaini Automation is a holistic Mechanical, Electrical, Plumbing, and Fire Protection (MEP) Company that was developed by Al Hussaini Holding Company and Semac Automation Co.

All disciplines are housed and managed within a single company in order to maximise coordination, communication, and efficiency.

The Challenges

Before Xpedeon, Al Hussaini used a standalone accounting system that couldn't meet their needs, resulting in several critical issues:

• Limited cost tracking led to budget overruns

• Poor team collaboration caused delays

• Manual processes increased error risk and wasted time

• Missing integrated project management

• Lack of comprehensive, real-time financial and operational data

Why Xpedeon ?

Real-time cost tracking and accurate budget monitoring for complete project control

Customisable reporting options for generating tailored insights

User-friendly interface designed for construction industry professionals

Robust collaboration tools to enhance communication across departments

Scalable architecture to support diverse portfolios and future growth

Reliable customer support and implementation help from the Xpedeon team

Modules Implemented

Procurement

Inventory

Subcontracting

Contracting

Fixed Assets

Accounts & Finance

Budgets & CVR

Document Management

HR and Payroll

Xpedeon

The Value Delivered

- Process optimisation resulted in significant time savings
- Fewer errors allowed to focus on important goals
- Real-time data improved the decision-making process
- The implementation helped the team to work collaboratively
- Detailed reports revealed key business insights

The Xpedeon Impact

30%
faster project cost tracking

25%
reduction in data entry errors

40%
faster report generation

20%
boost in team productivity

What They're Saying

"I've seen how Xpedeon has transformed our business. We were struggling with disconnected systems across our departments - inventory, procurement, subcontracting, you name it. It was a real struggle. Xpedeon has made a noticeable difference for us. It overhauled our digital workflow in the accounts and payroll system, making everything fully integrated and automated. Capturing transactions is smooth sailing and brought a new level of efficiency to how we work.

One of the biggest improvements is in our data management. Before, we were always playing catch-up, trying to make sure information was consistent across different platforms. Now, everything's captured digitally in real-time. It's given us this incredible transparency we never had before.
The impact on our decision-making has been huge. We're not fumbling in the dark anymore - we've got clear, up-to-date insights at our fingertips. It's made us more agile, more efficient.

What I really appreciate is how Xpedeon has supported us in scaling. We're no longer held back by manual processes. We can actually focus on growing the business, knowing our core operations are solid."

Mr. Nabil Raslan
General Manager, Al Hussaini Automation
